

BoatBoard (HDPE)

Simona HDPE BoatBoard: UV & Water Resistant HDPE

[Enquire Here](#)

Simona BoatBoard HDPE is a premium grade High Density Polyethylene weather proof HDPE used primarily for marine applications. With its superior flatness and low inherent stress, Simona BoatBoard HDPE sets the standard for fabrication ease among weather resistant sheet products for outdoor applications. This HDPE Boatboard includes marine components, cabinetry, furniture and other outdoor structures. Available in standard and custom marine colors, this highly UV resistant material has a durable matte finish that cleans easily and looks great long term.

For lighter weight, consider Simona BoatBoard LW, which is a similar material but lighter weight. Its foam core provides a 25% lighter option in applications that don't need the stiffness and edge finish of solid BoatBoard.

HDPE BoatBoard Properties

- UV stabilised for outdoor marine applications
- High chemical resistance
- Outstanding processing parameters
- High strength and rigidity
- Extremely versatile
- Some grade approved for contact with food
- Australian & New Zealand Standard AS/NZS 4020:2005

HDPE BoatBoard Applications

- Marine Industry
- Outdoor furniture
- Home outdoor living cabinetry
